DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-14, 34, 36 and 38-40 are drawn to image partitioning classified in class 382, subclass 240.
 - II. Claims 15-29, 31-33, 35, 37 and 41-42 are drawn to modeling and simulation, classified in class 703, subclass 2.
2. The inventions are distinct, each from the other because:
3. Inventions I and II are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because image partitioning does not necessarily require modeling or simulation. The subcombination has separate utility such as different types of simulation software.
